Press Note**

Rajbhawan,Dehradun, February 06th, 2019

Ambassador, Royal Norwegian embassy Mr. Nils Ragnar Kamsvag made courtesy call on Governor Smt. Baby Rani Maurya on Wednesday at Rajbhawan. Governor said that Norway is known to have expertise in aqua culture, power sector and green technology globally. She said that there are immense possibilities in Uttarakhand in fisheries, hydro power projects, solar energy and green technology sectors for Norwegian companies. The State of Uttarakhand is investor friendly state. Single window system has been implemented for the investors here. Many policy based decisions has been taken to promote the investment in Uttarakhand. She hoped that visit by Ambassador of Royal Norwegian embassy would promote the bilateral relationships.

Ambassador, Royal Norwegian Embassy Mr. Nils Ragnar Kamsvag told that trade relationships between the India and Norway are strengthening. Earlier Norwegian companies used to focus in Maharashtra and Gujrat but now they are interested in U.P and Uttarakhand too. Presently around 140 Norwegian companies have expressed interest to invest in various states of India. Norway has done good work in run of river fisheries technology. With the help of Norwegian technology good quality fish production using lesser amount of water is possible. Norway has developed high end technology in hydro and solar energy. Norway has done agreement with Survey of India and IIT Roorkee in research works. More than 50 percent cars are emission free in Norway in transportation sector. Norway in committed to make all of its vehicles emission free by 2025.
